## 320 Student Desk Specifications

**Frame:** All-tubular frame design with attachment plate, 18 gauge x 1.250" tubing up-rights, multiple arc welded into a integral design. 1.250" x 18 gauge tubular cross brace is welded to connect each leg. Minimum 24" of total weld. Frame upper is powder coated after all welding is complete.

**Standard Chrome Insert Finish:** Chrome is comprised of metal layers (Nickel & Chromium) electrostatically bonded to metal. Our standard is 4-6 mills (25%-50% more than our competitors) of Nickel. Hard-Chrome will not scratch. CASS test per ASTM B 368 - 22 hours harsh tested before rust. Our product is chromed on plateable quality tubing after all welding is completed.

**Standard Frame Finish:** Electrostatically applied powdercoated Textured Powdercoat hides fingerprints and offers superior wear resistance due to the raised surface.

**Inserts:** 1.125" diameter, nickel/chrome plated tubing with punched holes to receive two adjustment screws per leg. Leg adjustment uses self-tapping locking screws which pass completely through both upper leg and lower insert.

**Glides:** Four independently adjustable nylon glides. Glide adjust via inside holding metal threaded adapter. The units allows for easy adjustment for inconsistent floors.

**Solid Plastic Top:** Solid molded thermoset plastic. 19" x 26" work surface with smooth molded edges and permanent color throughout thickness. Molded pencil groove. Top is attached using self-tapping screws into twelve uniformly drilled holes.

**Laminate Top:** Three-ply construction. 20" x 21" x 27" High pressure laminate and backer are 'fused' to the wood core base using a glue web formulation that is clean, environmentally safe, extremely consistent. Thick bull-nosed edging. Top is attached using self-tapping screws into twelve uniformly drilled holes. No pencil groove.
