300 Student Desk Specifications

Frame: All-tubular design, 16 gauge x .930" x 2.16 flat oval tubing uprights, multiple arc welded into a integral design. 3/4" x 2" x 16 gauge tubular cross brace is welded to connect each leg. Minimum 20" of total weld. Frame is powdercoated after all welding is complete.

Standard Insert Chrome Finish: Chrome is comprised of metal layers (Nickel & Chromium) electrostatically bonded to metal. Our standard is 4-6 mills (25%-50% more than our competitors) of Nickel. Hard-Chrome will not scratch. CASS test per ASTM B 368 - 22 hours harsh tested before rust. Our product is chromed on plateable quality tubing after all welding is completed.

Standard Frame Finish: Electrostatically applied powdercoat. Textured Powdercoat hides fingerprints and offers superior wear resistance due to the raised surface.

Inserts: 3/4" x 2" diameter, nickel/chrome plated tubing with punched holes to receive eight adjusting screws. Leg adjustment uses self-tapping locking screws which pass completely through both upper leg and lower insert.

Glides: High quality molded insert. Four independently adjustable nylon glides fit through insert tube locking in cap. The units allows for easy adjustment for inconsistent floors.

Solid Plastic Top: Solid molded thermoset plastic. 19" x 26" work surface with smooth molded edges and permanent color throughout thickness. Molded pencil groove. Top is attached using self-tapping screws into seven uniformly drilled holes.

Laminate Top: Three-ply construction. High pressure laminate and backer are 'fused' to the wood core base using a glue web formulation that is clean, environmen-

tally safe, extremely consistent. Fused tops are well balanced on both sides to help prevent moisture absorption and warping.
