Millennium™ & Euroflex™ Lab Chair Specifications

Frame: 1-1/8", 16 gauge support braces are mig-welded to two seat brackets of 13-gauge die-formed steel. 8-gauge die-punched steel seat plate is welded to the braces, integrally tying all parts for maximum structural integrity. Cast Aluminum adjustment/mounting block is installed with four 3/16" bolts and two-way locking nuts. Powder-coated pneumatic lift and swivel column complete the seat platform.

Millennium™ Seat Shell: One-piece shell is injection molded from special high impact, blush resistant polypropylene plastic with and antistatic additive. Textured surface is etched to provide a non-slip surface while assisting in maintaining like-new appearance. Flanged opening in the back adds strength and ventilation. The underside of the shell is molded with an advanced rib pattern transferring weight directly to the frame. Shell size is 15-3/4" wide x 15-1/2" deep. The shell is attached to frame with four concealed machine rivets.

Euroflex™ Shell: Generously sculpted one-piece shell is injection molded from proprietary high impact, blush resistant polypropylene plastic with and antistatic additive. Collaborative seat design can be comfortably sat in all four directions. Dual textured surface is etched to provide a non-slip surface while assisting in maintaining like-new appearance. Responsive, active, back encourages proper task position as well as ventilation. Seat back incorporates handle for movement. Innovative design and rib pattern transfers weight to the frame while adding rhythm and movement. Mobility wings in seat provide more surface and grips for movement. Shell design allows inverted stacking on desk for floor maintenance. The shell is attached to frame with four concealed machine rivets. Waterfall front for enhanced circulation. Exclusive dual-stacking design.
